

**IN THE CLAIMS:**

Please cancel claims 1-2 without prejudice to or disclaimer of the subject matter recited therein.

Please add new claims 3-4 as follows:

**LISTING OF CURRENT CLAIMS**

Claims 1-2. (Canceled)

Claim 3. (New) A centrifugal fan wheel comprising:

- a) a hollow hub having:
  - i) a hollow portion;
  - 5 ii) a hollow hub axis connected to a top of the hollow hub at a center of the hollow portion protruding toward a bottom of the hollow hub;
  - iii) a closed part located on the bottom of the hollow hub;
  - iv) a curved guiding inlet part located on a side of the hollow hub; and
  - 10 v) a curved surface located between the closed part and the curved guiding inlet part and having a smooth fillet extending to the closed part; and
- b) a set of blades located on an exterior of the hollow hub and having:
  - i) an up ring located on a top of the set of blades;
  - 15 ii) a down ring located on a bottom of the set of blades and having an inner part connected to the closed part of the hollow hub and a plurality of perforations located through a bottom thereof, each of the plurality of perforations is spaced apart an equal distance;
  - 20 iii) a plurality of blades located between the up ring and the down ring, each of the plurality of blades is spaced apart an equal distance; and
  - iv) a plurality of wind holes located between the plurality of blades;

25

wherein each of the plurality of wind holes communicating with an exterior of the bottom of the set of blades through one the plurality of perforations.

Claim 4. (New) The centrifugal fan wheel according to claim 3, further comprising a plurality of ribs extending radially for the center of the hollow portion on the interior of the hollow hub.
